Tooth Friendly

### Calcium supplements-Key to bone health

“Consideration of nutritional supplementation is appropriate, not only at an individual level, but also at a population level. The Surgeon General, in his Report on Bone Health and Osteoporosis, stated “Calcium has been singled out as a major public health concern today because it is critically important to bone health and the average American consumes levels of calcium that are far below the amount recommended for optimal bone health.”

US Department of Health and Human Services. Bone health and osteoporosis: a report of the Surgeon General (2006)

Each Chew-tab contains:  
Calcium Carbonate ..... 750mg  
Vitamin D3 ..... 100 IU

Chewable Tablets  
**NutriCal-D**  
Coral Calcium | Vitamin D  
DIETARY SUPPLEMENT

Chewable Tablets

# NutriCal-D

Coral Calcium | Vitamin D  
DIETARY SUPPLEMENT

## Nutrical-D provides benefit to:

- Women who are going through the menopause, pregnancy or lactation.
- Growing children with increased calcium demands.
- Those who wish to build strong bones and healthy teeth.
- People who need to regulate muscle contraction, including their heartbeat.
- Athletes who may have experience repetitive injury to their bones.
- Those who are on restricted diets or lactose intolerant.

## Nutrical-D offers multiple advantages:

Contains coral calcium, which is highly soluble and easily absorbed by the body.

It's proven to prevent bone loss and allows more calcium to get into bone.

It does not promote gas production in digestive tract compared to other calcium sources such as calcium carbonate.

It improves absorption of calcium even in people who are deprived of the sun.

It reduces the risk of kidney stone accomplished with calcium treatment.
